Alternatives to the Use of Glyphosate

An event hosted by MEP Sarah Wiener, Benoit Biteau, Tilly Metz and Martin Häusling

The Greens/EFA group invites you to a double panel discussion on Tuesday, the 11th of April at 13:00 on the study Weed management - alternatives to the use of glyphosate, led by scientists members of the Pesticides Action Network.

Based on the current scientific state-of-the-art, the first panel discussion will address the impact of the use of glyphosate on soils, nature and humans. US groundkeeper **Dewayne Lee Johnson** will be our special guest, to testify as a living victim of toxic herbicides. Then **Dr Fraeyman** and **Dr Mandrioli** will share the main findings of their recent works on genotoxicology and ecotoxicology.

The second panel will offer the opportunity to farmers to discuss the main findings of this study, shared by PAN expert **Gergely Simon**. Conventional farmer **Jean-Bernard Lozier** (France) and organic farmer **Tijs Boelens** (Belgium) will demonstrate that despite the claims of the agro-industry, alternatives to the use of this herbicide do exist and could be promoted via the Common Agricultural Policy.

The event will be hosted by AGRI committee and Greens/EFA Group members **Sarah Wiener**, **Benoit Biteau**, **Tilly Metz** and **Martin Häusling**, in room PHS 4B1. Interpretation in DE/EN/FR will be provided, as well as remote participation.
