Climate Package

European Parliament's committees start discussions on the files of the Commission's "Climate Package"

The files of the "climate package" to be discussed by the Parliament's committees are the following ones (in brackets the name of the file in the European Parliament):

- Renewables directive (Energy produced from renewable sources)
- ETS directive (GHG emission allowance trading scheme)
- Effort Sharing (Shared effort to reduce GHG)
- Carbon Capture or Storage (Geological storage of carbon dioxide)

Two of those very important files (the renewables directive and the "effort sharing") will be lead by Greens/EFA MEPs (Claude Turmes and Satu Hassi are respectively the "rapporteurs").

Another crucial legislative proposal under discussion is the one on the emissions of cars, also on the agenda of the environment and energy committees this week.
