## **Switch to green power!**

### **Greens/EFA action on the eve of the Kyoto day**

To switch on the television or the computer is a daily act which has become a reflex. We almost forget that behind this hides polluting electricity! Almost 2 years after the Kyoto protocol agreement came into force, it is now really urgent to act in order to tackle climate change. By **switching to green electricity** we can all contribute to a climate friendly electricity production!

To mark the Kyoto birthday Green MEPs held an action in the parliament to promote 'green' power.

Get the leaflet on green electricity (pdf)

See also the press release and the Picture of the Green/EFA members' action
