Greening the EU Energy Roadmap 2050

A Greens/EFA event

See the documentation of the event

- [Video of the conference](#)

The European Commission will present the EU Energy Roadmap this autumn. This paper will follow the Climate Roadmap 2050 adopted by the Commission on 8 March 2011 and present a number of policy measures for the decarbonisation of the energy sector. The EU has committed to an 80-95% reduction in greenhouse gas emissions below 1990 levels by 2050. Ahead of the publication of this key document, the Greens/EFA group organises a conference on 22 September to consider what should be the necessary steps and measures that the European Union should take to achieve its ambitious goals in both the energy and the climate sector.

PROGRAMME

9:30- 9:35

Introduction

by **Bas Eickhout** MEP (5 min) 9:35 – 11:00
