Is making the EU a champion of green ships a utopia

Gathered around experts, we invite you to discuss the solution to reduce maritime transport impacts on the sea by developing a European green ship industry.

In the post-covid context, The EU underlined the necessity to enhance resilience, sovereignty and to re-industrialised Europe. We believe the Recovery Plan should be an opportunity for the EU to focus on modernising and greening its shipbuilding yards, and to promote the development of decarbonised technologies, as well as greater cooperation at EU level.
