## **Safeguarding the renewable energy directive (RED II)**

### **Live Webinar - Register here!**

The Renewable Energy Directive has been the EU's central policy tool to reduce renewable energy costs, boost renewable deployment and create a booming renewable energy industry across Europe.

There is no justification to expand the scope of the Directive to non-renewable energies, such as fossil fuels or nuclear, and any move to do so would undermine trust in the EU's renewable energy policy.

With stakeholders across Europe keen to have their say in the shaping of this Directive it's time to bring the debate to the political level.
