No e-fortress Europe!

Stop the creation of an electronic fortress Europe!

The European Commission and EU Member States want to achieve a complete surveillance of all EU borders and all non-EU travellers. Help us stop this electronic fortress Europe!

Smash smart borders!

Raise your fist against the electronic fortress, take a picture of it and send it to your friends, followers and to us.

Here is how it works!

The more people who participate, the merrier. We will hand over the pictures to Home Affairs Commissioner Cecilia Malmström in the beginning of June.

Take part NOW!

 Already on March 9th 2012 the EU home affairs ministers want to take a decision on whether or not to go for the creation of "smart borders". In the middle of April, the European Parliament will vote on the profiling of airplane passengers. The negotiations on Eurosur have already begun. Commission and Member States have already chosen their path: they want an extensive surveillance of the Mediterranean. Help stop them! Smash smart borders now!
