PLENARY FLASH: Greens/EFA Priorities 6 to 10 July

Deforestation

The Greens-EFA will vote against the objection supported by the right-wing groups to hamper EU legislation to protect forests. The EU imports 90% of its soy to produce biofuel. This causes deforestation in large areas of Brazil and has damaging effects on the environment, the biodiversity, the local populations and the global climate. Soy should be part of the list of high-risk feedstocks and biofuels deforestation-neutral.

GREENS/EFA PRESS CONTACTS
