## Keep on track, reduce dependency, invest in jobs and competitiveness

### EU Scientific Advisers/new report on climate action

On today's new report of the EU Scientific Advisers **Bas Eickhout**, Co-President of the Greens/EFA group in the European Parliament, comments:

*"The clear message of the EU Scientific Advisory Board is to keep on track and stick to investing in renewable energies. Scientists show a clear red card towards dirty tricks playing international carbon credits against climate action within the EU, as Climate Commissioner Wopke Hoekstra suggested.*

*It is again scientifically approved that 90 to 95 per cent fewer CO2 emissions domestically by the year 2040 will be feasible. Our message to all those who advocate for the roll-back to fossil energies: Stop creating planning insecurity, but rather invest in climate action, reduce our dependency and fossil autocrats, accelerate clean technology innovation, create jobs and reinforce the EU's competitiveness."*
