Patents and new genomic techniques

Do not risk the future of our seeds!

This event is co-hosted by Green/EFA MEPs Martin Häusling, Sarah Wiener, Thomas Waitz and Benoit Biteau together with No Patents on Seeds.

If these efforts are successful, the EU will see a surge of patented seeds, including both genetically engineered and conventional seeds. This would have severe consequences for breeders, farmers, food producers and consumers. Our conference will provide new information on recent patent applications and discuss the potential impacts of patented seeds on EU plant breeding, farming and consumers.
